DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-23, drawn to a semiconductor package, classified in class 257, subclass 737.
 - II. Claims 24-49, drawn to a method for making a semiconductor package, classified in class 438, subclass 613.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions Group II and Group I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, Invention Group I could be made by another different method. . For example, Invention Group I could be made without patterning and etching the dielectric layer so as to form the dielectric layer into a pair of opposite dielectric partition walls that are disposed at two opposite sides of each of the bonding pads.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

3. If Applicant elects Group I, further restriction is required:

This application contains claims directed to the following patentably distinct species of the claimed invention:

Species I: Figs. 1-10.

Species II: Figs. 11-13.

Species III: Figs. 14-16 and 20.

Species IV: Figs. 17-19.

Species V: Figs. 24-27.

4. If Applicant elects Group II, further restriction is required:

This application contains claims directed to the following patentably distinct species of the claimed invention:

Species I: Figs. 35-38.

Species II: Fig. 39.

Species III: Figs. 40-41.

Species IV: Fig. 42.

Species V: Fig. 43.

Species VI: Fig. 44.

Species VII: Fig. 45.

Species VIII: Fig. 46.

Species IX: Fig. 47.

Species X: Fig. 48.

Species XI: Fig. 49.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, none of the claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the

Art Unit: 2822

examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thanh Y. Tran whose telephone number is (571) 272-2110. The examiner can normally be reached on M-F (9-6:30pm).
